

Health Screening Tests

Please read and a technician will explain further

Lawrenceville Family Eyecare takes pride in offering advanced eye care technology. Our market research tells us that patients want technology that helps safeguard their eye health. We recommend three screening tests at your annual eye examination. These tests are not covered by insurance plans because they are preventative in nature, but we have tried to keep the price as low as possible.

- **OPTOMAP** Recommended for all patients annually. **\$45**

Your doctor recommends *OPTOMAP* as an integral part of your eye exam today. An *OPTOMAP* provides him with the view of the entire inside of your eye in a single capture, something that can only otherwise be achieved by dilating your eyes. *OPTOMAP* is fast, easy, and comfortable. Unlike dilation there is no need to instill drops in your eyes and wait 45 minutes for them to take effect and you will not experience the unpleasant side effects of blurred vision and light sensitivity for four to five hours.

- **Screeener OCT** **\$29**

This device enables the doctor to see the ten layers of the retina (the light sensitive tissue inside your eye) that is only one millimeter thick and detect very early changes associated with systemic diseases such as diabetes and high blood pressure. This test is also recommended for patients with a family history of macular degeneration or other inherited eye diseases.

- **Corneal Topography** **\$19**

This test maps the surface of the cornea and assists in the early diagnosis of corneal degenerations like keratoconus. With the advent of new treatments to halt these conditions in their early stages, it is very important to screen children and young adults. This test is also recommended for dry eye patients and for contact lens wearers since it allows the doctor to custom fit the contacts to the contour of the cornea enhancing comfort and sharpness of vision. There is no charge for this test for patients having s contact lens evaluation.

- **Combination Value.** Save \$30. The usual fee is \$93 – all three tests for **\$63**
